

PROJECT REFERENCE

PRODUCT CATEGORY

OIL SPILL EQUIPMENT

PRODUCT NAME

Permanent Boom

APPLICATION

Petroleum Depot

SPECIFICATION

200m Length

LOCATION: SANDAKAN, SABAH

FUNCTION: Oil Spill Response Boom (replacement boom)

Requirement for 24 hours protection for facilities or vessel to contain spill around the clock, EMPTEEZY has Permanent Boom designed for this specific application. The boom is durable and UV resistant providing years of 'In the water' service. Our Permanent Booms are safeguard against spills that will happen when they are not expected.

Proven with years of service with bulkhead, cable risers, and service hardware allow the Permanent Boom to stay attached under and around piers. Self-adjusting for tidal fluctuation

All edges of the Buoyant Floatation are rounded to prevent the float from gouging the barrier fabric during flexing of the boom, allowing the fabric to handle the stress of flexing with minimum wear

Rotationally moulded & closed PU foam filled floats with nominal thickness of 4-6mm and corner exceeding 8mm provide great structure / integrity make it impact resistance and long lasting

International Safety Orange (Outrageous Orange) is our primary Buoyant Floatation colour. This particular shade is renowned for its ability to remain colourfast.

UV and Colourfast stabilizers added to ensure a long lifespan
